

## CONTRACTOR IS THANKFUL

HE CALLS ON THE UNITED DOCTORS TO TELL THEM SO.

THEY CURED HIM AND HE WANTS THEM TO KNOW IT.

Many Patients Are Calling on the Specialists for Consultation and Treatment.

A. T. Holder, a bridge contractor of Carthage, Mo., who enjoys a wide acquaintance over Oklahoma and Kansas, spent Tuesday in the city on business and pleasure.

The pleasure part of the visit consisted in meeting old friends and telling them how he had regained his health. Mr. Holder called on the United Doctors at their institute, located at 410 Kansas avenue, to express his thanks for the cure they have given him and to state that he considered himself entirely well.

Mr. Holder had suffered from gallstones for a long time. He was not sick all the time—in fact, he would often go for a month or two without any trouble, then he would have an attack of gallstone colic, which would lay him up in terrible agony for several hours. These pains were liable to come any time and could only be relieved by strong opiates. The pains were gradually getting closer and closer together, and it looked like the only hope was in a surgical operation.

Mr. Holder had about decided to submit to an operation in hope of getting some relief, when a friend told him of the wonderful work the United Doctors were doing. He went to their institute and placed his case in their hands. After commencing the United Doctors' treatment he only had one attack, which was eight days after beginning the treatment. That was five months ago. He is now sound and well—has no trouble whatever, and gives all praise to the United Doctors.

The Topeka Institute of the United Doctors is located at 410 Kansas avenue. They have just as great success in treating Rheumatism, Vital Weakness, Weak Back, Nervous Debility, Bladder and Urinary Diseases, Sciatic, Constipation, Catarrh, Poor Circulation, Dyspepsia, Indigestion, Anemia, Sleeplessness, Flus, Piles, Neuritis, Kidney and Liver Troubles, Spots, Flooding Before the Eyes, Palpitation of the Heart, Shortness of Breath, Headache, Pains in the Chest, Back, Hips and Ankle, Heart Trouble, Weak Lungs or Bronchial Tubes, and Diseases of Men or Women, just as well as Gall Stones.

Examination is free. A reasonable charge is made for medicines. The United Doctors accept no honorable cases for treatment. If you can not be cured they will frankly tell you so and not accept one penny.

People are coming daily from distant points in this state and Oklahoma to take this wonderful treatment. The United Doctors, as they are recognized as being the most progressive and scientific specialists of the age. Their treatment combines all the best methods of all known systems of treating diseases. They cure even after long failures. The office hours are 9 till 12; 2 till 5; 7 till 9 p.m.

## SANTA FE'S WORK

More Than 450 Added to Topeka Forces in Last Year.

Half Million Dollars Spent in Improvements.

PAY ROLL IS \$3,180,000

Big Increase in Wages Paid to City Employees.

What Santa Fe Has Contributed to Topeka Prosperity.

More than 450 employees have been added to the working forces of the Santa Fe in Topeka in the last fiscal year. The pay roll has been increased by nearly a half million dollars and \$500,000 has been spent in improvements in this time.

Not since the shops were built here has the Santa Fe made such extensions to their interests. The road has turned into Topeka for wages in the last fiscal year \$3,180,000. This is the greatest sum paid out for labor in the history of the city.

At this time one-fourteenth of the pay roll of the entire Santa Fe system of 11,000 miles remains in Topeka. One-half of the entire force of general office clerks on the system is in Topeka. Nearly one-half of the entire shop force of the Atchison, Topeka & Santa Fe are employed in this city.

In the fiscal year which ended last night, the monthly pay roll in Topeka amounted to \$265,000. Of this amount, \$90,000 a month was paid to general office employees and \$175,000 a month to employees of the shops. This totals to \$3,180,000 annually, or a half million more than was paid into the city last year.

The number of employees in the general offices now number 1,230. This is a gain of 150 over last year. In the shops 3,300 men are now working, making an increase of 300 in the last fiscal year. This totals 450 in the year. It means according to census figures, an addition of 1,800 to the city. The total number of Santa Fe employees in Topeka, 4,600.

In Kansas alone the Santa Fe employs more than 20,000 men. It will be seen that Topeka has nearly one-fourth of the employees of the whole state. In Kansas the Santa Fe pays the employees in wages \$11,500,000 and the taxes amount to considerably more than a million and a quarter annually.

With the extension policy in the shops where freight cars, locomotives and passenger coaches will be built, with the possibility of a new passenger station, with the probability of making this city a much larger official headquarters, Topeka has a bright future mapped out by the Santa Fe.

General offices of the Santa Fe do not deny that with the new 10-story general office building and with the extra room in this structure, it means that clerical forces from smaller terminals will be transferred to this city. It is admitted that with all the working forces centering in one city the work is distributed more easily and more economically.

With the constant encouragement from the Commercial club and the support of the business men of the city, the Santa Fe will make extensive plans at all times in Topeka. It is estimated that 15,000 people in Topeka are directly dependent upon the Santa Fe—and 10,000 more are here as a direct result of the \$3,180,000 pay roll that comes in every year.

The Santa Fe is building up its wonderful office and shop plants in Topeka every year. Every season new buildings are added and the head-quarters made more substantial. What is ahead for this city—even the officials can guess. But no one denies that Topeka is due to become the greatest shop and official center in the country.

## DENIES PAUPER BURIAL STORY.

Case Against J. Luther Taylor Thrown Out of Court.

Pittsburg, Kan., July 1.—J. Luther Taylor of this city denies the truth of the article in Kansas papers in which deposition produced in court was quoted from. The article was to the effect that Mr. Taylor refused to buy a burial suit for his father who died recently at Claremore, Okla., and that he buried him in a pauper's casket. Mr. Taylor states that his father's body was shipped to Pittsburg in a casket because there was none other obtainable at Claremore, but that when the body reached Pittsburg it was placed in a casket and a steel case costing \$50.

The will case in which the false deposition was introduced was today thrown out of court, the plaintiff having failed to make a case.

## WHEAT BEATS FIFTY BUSHELS.

Record Yield for Northeast Kansas Reported From Atchison.

Atchison, Kan., July 1.—The wheat field on William Hundke's farm north of here is producing fifty-one and one-half bushels an acre, which probably is the record for northeastern Kansas.

## GRAY HAIR

Easy to Restore Natural Color of Your Hair by Simple Method.

Science has just been finding out some of the most amazing things about the hair—discoveries that over turn many old ideas.

For instance, with a newly discovered harness the natural color is restored by a simple treatment that can be applied by any one in a short time. This is the Queen Gray Hair Restorer. It is a liquid preparation that makes any discolored shade from the one package, leaving the hair soft and fluffy, and making a lasting color that is not sticky and does not rub off.

The Queen Gray Hair Restorer is instantaneous in its effect and restores the natural color of your hair. It is in two sizes, 50c and \$1.00, and can be obtained from T. V. Campbell, 704 Kansas Ave., and the leading drug and department stores throughout the country.

The best hairdressers use it and sell it to their patrons.

Even if it were not for the by-

THE LITTLE "GREEK CHEMISE" FOR HOME WEAR.

One of the prettiest negligee styles that Paris has ever evolved is this adorable little "Greek chemise" which may be slipped on over a dainty petticoat in one's boudoir. A cord run through a casing at the waist confines the loose fabric in graceful lines. There are no shoulder or arm seams and the garment is made simply of a long length of material, flung over the shoulder with a hole cut out for the neck and two almost straight seams at either side under the arms.

## SOCIETY.

(Continued from Preceding Page.)

Miss Ruth Williams of St. Louis is the guest of her parents, Mr. and Mrs. S. R. Williams.

The Mission Tea Room, 114 West Eighth avenue, will be closed until September 1.

The E. Hetherington family will move next week from their home, 1304 Harrison street, to 1212 Harrison.

Mrs. T. W. Israel and her daughter, Cecelia, returned today from Denver, where they spent three weeks visiting friends.

Mr. E. L. Hotchkiss of San Diego, Cal., arrived today on a visit to the home of Shakespeare and to his burial place, Stratford-on-Avon.

Pickens are showing some pretty duck hats, in white or colors, that may be laundered. They may be worn with or without trimming.

Mr. E. O. H. Slusher has gone to Minneapolis, Minn., where she was called by the serious illness of her mother, Mrs. G. W. Smith.

Miss Clara Coulter, who has been the guest of Miss Percy Montgomery, will return to her home in Chanute Sunday.

Miss Vida Gail and Miss Mildred Lewis will leave tonight for West Milford, N. J., to visit Miss Gail's sister, Mrs. R. H. Markham.

## EVENING CHAT

BY RUTH CAMERON.

"Make it a practice to frequently ask your children to define the words they use and hear other people using and you will be giving them a liberal education."

Such is the theory of a man at whose home I sometimes visit.

He has five children, ranging from eight to nineteen years, and he is perpetually asking one or another of his flock to define some word that comes up in the conversation.

"An enlarged vocabulary."

"A habit of accuracy."

These are the benefits he claims his children derive from this training. And according to a school teacher who has had them all in her classes, they certainly seem to possess these qualities, wherever they have obtained them.

It is really remarkable how few people can define accurately even comparatively simple words. You all probably know the old trick of asking people what "spiral" means. To one person who will attempt to define the word there are at least 999 who will immediately begin waving their hands in the air to illustrate a spiral staircase.

We know in a vague way the meaning of many words that we cannot easily define. For instance, you doubtless use the word "vacuum," and then you know the meaning of them, but try to define them off-handed and then see how near you come to the dictionary definition.

Too many of us are like the student who, when asked by his professor to define "vacuum," said: "I can't exactly define it, but I've got it in my head."

Sometimes the words my friend asks his children to define are unusual words, of which he thinks all the family may not know the meaning, but quite as often they are simple, everyday words, whose definition he asks merely for the training in accuracy and self-expression.

The last time I was there someone used the word "morbid" and Mr. S. asked twelve-year-old Margaret to define it.

She thought a moment before she tried to say that, also, is an excellent habit her father tries to inculcate—and then said that a morbid person was one who brooded over things. That is just about what I would have said myself, but referring to the dictionary—which I had been using with Cuticura Soap, I found that in this household, kept in a convenient spot, and not such an ark and so inaccessible that one prefers ignorance to the Herculean task of getting it out—proved the exact meaning to be "diseased," "unhealthy."

"Pensible," "optional" and "satire" were also defined in the course of the evening.

When we realize that although there are over 400,000 words in the English language, the average man does not use over 3,000 or 4,000, and the man who doesn't do much thinking goes along with 1,000, it seems to me we ought to be anxious to take advantage of any scheme for helping our children to enlarge their vocabularies.

Even if it were not for the by-

A DAVIES GAS IRON SAVED TIME. KANSAS APPLIANCE CO. 816 KANSAS AVE.

party to England, the letter said: "The captain said he never took his ship through a rougher sea in June in 24 years and in two years he had no such a voyage in winter or summer. The waves dashed the spray more than a hundred feet high, clear over the top of the mast, which was 30 feet high. We had a splendid ship, very heavily loaded, so it was as steady as any boat on the ocean."

The letter said that the party would arrive in Paris on June 23.

## HOTTEST AND DRIEST.

No June in 25 Years Has Approached Its Record.

"June, 1811, was, without exception, the hottest and driest June experienced at Topeka in the past quarter of a century," reads the report issued at the local government station. "It was the driest June in the past quarter of a century, and the hottest."

In addition to this it was warmer than any month of the same name, except July, 1890 and July, 1907. During this period no May or July and no August has been drier than the month just past. Since March 1 the precipitation at Topeka has been 61 per cent less than the normal amount and the drought during that period has been the most severe on record for that time of the year.

The average temperature of the month was 84 degrees, which is 7 degrees above the normal, and 3 degrees higher than any previous June. The highest temperature was 106 degrees on the 25th and was within three-tenths of the record of the highest temperature ever recorded at Topeka. The temperature reached 90 degrees or higher on 23 days during the month and reached 100 degrees or higher on 4 days.

The rainfall during the month amounted to but 0.55 of an inch which is only 13 per cent of the normal amount. This rain fell on four different days and was entirely inadequate for present needs.

"During the month there were 21 clear days, 7 partly cloudy days and out 2 cloudy days."

The highest wind velocity was 47 miles an hour at 10:35 p. m. of the 16th, but the most destructive wind was the hot wind of the 25th which reached a maximum velocity of 31 miles an hour on that day.

"The average hourly velocity of the wind during the month was 11 miles and the prevailing direction was from the south."

## CHICKENS ARE PLENTIFUL.

No End of Spring Fries for the Glorious Fourth.

Spring fries will be plentiful on the Fourth of July. It will be good news to many a housewife in Topeka to know that the supply of spring chickens is abundant and that the price of young fowl flesh will probably be 30 cents a pound, which is slightly cheaper than last year at the same time. There is a good crop of chickens this season, although vegetables and fruits are scarce.

Potato chips are always in demand on July 4, and it is anticipated that the hand that them that the supply will not be as plentiful as is usually the case, due to the scarcity of "spuds."

Potatoes are still selling at 75 cents a bushel, that is, good potatoes. Small scrubby ones can be had for 60 and 65 cents a bushel.

There is a good stock of vegetables on the market and the products of the fields of Michigan. Hot house cucumbers are being sold.

California peaches, plums, apricots and black and white cherries are on the market and the supply of cantaloupes and watermelons shipped in from the Imperial valley in Colorado and Texas respectively is plentiful.

Green cooking apples are now on the market from the local orchards and are selling at 50 cents a bushel, but the supply of berries is almost exhausted.

## FIFTH DISTRICT EDITORS MEET.

Investigation of Cost of Ready Print to Go On.

Concordia, July 1.—Twenty-five editors of the Fifth district met at Concordia, Mo., Friday night. After an auto ride over the city, the local newspaper men and the Business Men's association of Concordia invited them to the Colson cafe for luncheon. After this the meeting was held at the Commercial club rooms. Mr. E. W. Rankin of Topeka was the principal
